Subject: Microsoft Settlement

Please stop any more persecution of Microsoft. Enough is enough! Microsoft should not be disbanded. They product they provide is fantastic value for the price. They are not endangering the end user by bundling their software.

If the consumer wants other products, they are free to buy them. Just because Microsoft is successful at what they do, they should not be penalized anymore than they already have. Let the competitors improve their products, that is the fair and American way to compete in today's world.
